Colonel Frank Borman
National Aeronautics and
Space Administration
Manned Spacecraft Center
Houston, Texas 77058

Dear Colonel Borman:

I was delighted to receive the autographed photo of the moon looking out into the darkness at the bright blue, cloudy earth beyond. It is truly a beautiful sight. I was especially touched by your inscription and greatly appreciate your thoughtfulness in sending the photo to me.

I hope you will convey my appreciation to Colonel William Anders and Captain James Lovell, and want to wish all of you every success in your future endeavors. It was a pleasure to see you in Pittsburgh.

Again, my deepest appreciation.

Best wishes,

Henry A. Kissinger
